

THERE'S NO ANGLE TOO AWKWARD FOR AN ANGLEPOISE

**THROW A
SPOTLIGHT**

ON EVERY AERO JOB

Nothing demands greater precision than aircraft and aero engine design. You know those jobs which are so awkward to get at, where a strong, clear light is essential to accuracy! That's the job for which the Terry Anglepoise Lamp is ideal. Adjustable at a touch, it remains firmly poised, giving an uninterrupted light from any position. Perfectly produced by Terry's, the designers with more than 80 years' experience of engineering problems, the Anglepoise Lamp is the most adaptable for any lighting purpose.

We shall be pleased to send you further details. May our representative call and give you a practical demonstration?
