

DEGREASING

Here's a better way!

GUNK 901 AIRCRAFT COMPOUND

Specially prepared for cleaning fuselages, wings, undercarriages, cowlings, engine parts, etc.

Dissolves almost instantly all mineral oils, greases and petroleum jelly, but, being non-corrosive, does not react chemically on metal, wood, fabric, rubber or cellulose surfaces. Gunk is supplied ready for use and all that is necessary is to spray or brush it on the part to be degreased and cleaned, then hose or rinse it off with clean water. When used in tanks for engine parts, etc., it can be used many times over and will last almost indefinitely. Also suitable for restoring a perfectly clean appearance to greasy cement floors.

Available in 1, 5, 10 and 45 gall. sizes.

APPROVED BY THE AIR MINISTRY

Sole Distributors to the Aircraft Industry.
