

MONOCHROME PLATED

CRANK.

Designers can use harder bearing materials when crank pins and journals are Monochrome-plated. On Diesel cranks, Monochrome Plating eliminates all scoring and pick up difficulties.

TERRY'S AERO VALVE SPRINGS

for continuous 100% efficiency!

(Indispensable also for car and motorcycle engines)

AERO VALVE SPRINGS are the result of over 80 years spring-making experience and tireless research.

They are evolved with extreme care in the most up-to-date spring factory in the world, an organisation famous not only for springs but for pressing work in all metals, flexible shafting, cable controls, spring washers, automatically machined parts, etc.

Our research department is at the service of your engineers and designers. May we help with your spring problem?
