exclusively specifies**Palmer****SILVOFLEX TYPE 200****FLEXIBLE PIPES**

for High Pressure
Fuel Systems

Ministry of Supply draft Standardisation Design Memorandum No 247 issue 3 exclusively specifies Palmer Silvoflex Type 200 for new design High Pressure Fuel Systems. Palmer Silvoflex Type 200 have been awarded this distinction because they are the only flexible pipes to meet the stringent requirements of Specification DTD (RDI) 3954 issue 2. The outstanding durability and resistance to conditions that this specification vouches for have been more than confirmed by over SIX MILLION hours of trouble-free service on the high pressure fuel system of the ROLLS ROYCE DART.
