

Buying a pre-owned Gulfstream is a smart decision.

Buying it from us makes it an intelligent one.

If you're the business aircraft operator we think you are, you already know the advantages Gulfstream business jets offer. They have a well-earned reputation for superior cabin size and comfort, range, overall performance, and engine and systems reliability.

And if you're the businessman we think you are, you know you can move up to an excellent pre-owned Gulfstream III or Gulfstream II in today's market for a very attractive investment.

But before you move, talk to us.

We built every Gulfstream around, so we're uniquely qualified to help you get the most airplane for your money.

We can also do something else for you only the factory can do.

On selected pre-owned Gulfstreams available from us, these exclusive bene-

fits are included in the purchase price:

- **6 Months Warranty Program:** Gulfstream Aerospace warranty for 6 months or 300 flight hours (whichever comes first) on airframe and Gulfstream supplied components, plus Rolls-Royce (Canada) Ltd. warranty for same periods on engines and accessories.
- **Crew Training:** Complete training for two pilots and one maintenance person at FlightSafety International Gulfstream Learning Center.
- **Maintenance:** One year of Gulfstream Computerized Maintenance Program (CMP).
- **Compliance:** All mandatory Customer Bulletins and Aircraft Service Changes complied with.
- **Exterior Finishing:** Complete strip and paint to your specifications.

The reason we offer these unique benefits is simple.

We built exceptional value into every Gulfstream jet when it was new. We want to make sure you get as much of that same value as possible when you decide to own and operate one.

If the time has come for you to move up to a pre-owned Gulfstream, talk to Joe Villari, Manager, Used Aircraft Marketing. He can help you make your smart decision an intelligent one.
