

HAWKER 800XP

A cabin big enough for a standing ovation. And now, performance that deserves one.

Major decisions in the business world are often based on performance. And with this notion in mind Raytheon Aircraft offers the new Hawker 800XP. ▲ We took the Hawker 800, which has the most spacious cabin in the mid-size category, and dramatically improved its range, climb, speed, and payload. We've added more powerful engines, which now allow you to fly further out of high altitude and hot temperature environments. ▲ Raytheon Aircraft took the best selling business jet in its class, and made it better. Because in a world where outstanding performances are applauded, you need a business jet that can deliver them. For more information call 49-69-695808-15.
