

In Other Words:

EVERYTHING YOU'D EXPECT

From Fairchild Dornier.

Economics equal to or better than a turbo-prop for both short and long sectors, full stand-up headroom and wide seats, the integrated avionics of the Honeywell Primus 2000 system, and last but not least: Pratt & Whitney Canada 306B turbo-fan engines. The result: jet-propelled return on investment. Not surprisingly, we think the 328JET is going to cause our rivals sleepless nights. Because it's the right aircraft, at the right time, for your markets.

If you would like to know about the world's first true regional jet, simply call or fax us and join the 32* seat fan club.
