

Projects that make a difference. People who are outstanding.

Projects Engineer

c. £25,900 + benefits

At Virgin Atlantic we strive to make sure that everything we do is better than the competition. So we take particular care when it comes to the comfort and facilities on board our aircraft. As we expand our fleet to cover more and more long-haul destinations, we're looking for a Projects Engineer who can take delivery of basic aircraft, and make a real difference turning them into outstanding Virgin airliners.

Providing technical expertise and project management services to our Engineering department, you'll co-ordinate high profile engineering tasks including cabin reconfiguration, new aircraft specifications and major refurbishment projects covering everything from new galleys to the introduction of video systems. Primarily this role will be related to cabin video, entertainment and service systems. However, you'll also be involved with the specification and delivery of new A340 and B747-400 aircraft.

A major force behind the creation of new products on the fleet, you'll liaise broadly between internal engineering departments, the rest of the airline and outside suppliers. So you'll need to be a confident

negotiator with excellent communication skills and a good understanding of supplier relationships.

With professional aircraft engineering qualifications such as an HNC/HND and/or degree in a relevant aviation subject, or Aircraft Maintenance Engineer Licences, you'll have a broad technical and commercial knowledge from at least 5 years' industry experience. With a detailed, analytical approach to your work, you'll have the drive to take on increasingly large projects as our fleet expands.

We offer excellent benefits which include after a qualifying period, private health cover, life assurance, pension scheme and arguably the best concessionary travel scheme in the industry.

To apply, please send your C.V. and covering letter, quoting reference number ENG4, to Human Resources Department, Virgin Atlantic Airways Ltd., Unit 1, Satellite Business Village, Fleming Way, Crawley, West Sussex RH10 2NE. The closing date for receipt of completed application forms is Friday 19th September 1997.
