

**AVRO
RJ**

Freedom in the air.

Short fields, noise-sensitive communities, unpaved runways and mountainous terrain - the Avro RJ family takes them all in its stride.

The versatility of the Avro RJ70, RJ85 and RJ100 is total. Four, five or six abreast cabins, the choice is yours; as are mixed class options and convertible seating.

Super-flexible passenger accommodation is matched

by large, accessible freight holds, opening up new sources of revenue.

Continuous development keeps the Avro RJ family right at the forefront of regional operations, and unrivalled flexibility means there's always room for manoeuvre if the market changes.

Small wonder that with over 370 aircraft in service or on order, the BAe 146 and Avro RJ are the Regional Jets of Choice - giving you freedom in the air, and on the ground.

What airlines need, what passengers want. AVRO RJ - the Regional Jets of Choice.
