

# Extreme Space

Judging this book by its cover?  
Prepare for a surprise.

While lean and mean on the outside, the Piaggio Avanti P.180 takes spacious, comfortable travel to new heights on the inside. Until now, you'd have to pay up to twice as much to get a cabin as large as that of the Avanti.

Cavernous by comparison to its closest business jet competitor the Avanti has more room than you'll find in any other aircraft in its class. With oversized individual executive recliners, wider and deeper than the

Avanti P.180 70" h 73" w 375 cu. ft.	CJ1 58" h 58" w 186 cu. ft.
Premiere 65" h 66" w 335 cu. ft.	King Air 200 58" h 54" w 303 cu. ft.

*Cabin Dimensions\* & Volume\*\**

average business aircraft, the Avanti allows its passengers to travel – and work – in extreme comfort. Here, innovative Piaggio design makes its mark, because there's no obstruction in the ultra-wide, 16-inch aisle, giving passengers plenty of room to move about the cabin. And the unique combination wing/engine/fuselage configuration ensures a level of tranquility and comfort unparalleled by its peers.

Extreme space means cabin comfort at the highest level. Extreme velocity means you reach your destination on time. Extreme performance means a cruising altitude once reserved for only jets – 41,000 feet. And extreme efficiency comes in the form of a distinctive three-lifting surface design, lightweight construction and surprising fuel conservation abilities; the Avanti burns significantly less fuel than its closest jet competitor.

The Piaggio Avanti P.180. Beauty that goes way beyond skin-deep.

*Accent on Performance.*
