

8.33 kHz channel spacing expands in Europe on 31st October 2002 above FL 245

Within the Horizontal Expansion programme, 19 ICAO European States* will remove 8.33 exemptions on the 31st October 2002. Other States** will join in 2003.

This impacts operational aspects, including flight planning and tuning 8.33 kHz channels in 6 digits.

An awareness package (CD-ROM, info notice & poster) is available free of charge from the 8.33 Programme Support Office.
