Contents

1. Executive summary

Expert commentary on aircraft, financial and market outlook from named Flight authors from:

- (i) **Airline Business**
- (ii) **Air Transport Intelligence**
- (iii) **Commercial Aviation Online**
- (iv) **Flight International**

2. Technical information

- (i) **Technical specifications**
Technical data for core types
Technical data for competing aircraft
Comparison of technical specifications
- (ii) **Programme update**
Programme milestones since launch
Latest modifications & developments
Future planned developments
- (iii) **Technical drawings**
Flight archive cutaway technical drawings of core types
General arrangements of versions and variants

3. Fleet profile

- (i) **In-service fleet**
Current worldwide active fleet
Analysis by country/region
Analysis by type/sub-type
Market share versus competing types
- (ii) **Orders**
Annual new aircraft orders since launch
Analysis by customer type
Analysis by country/region
Market share versus competing types
- (iii) **Deliveries**
Annual new aircraft deliveries since launch
Analysis by customer type
Analysis by country/region
Market share versus competing types
- (iv) **Storage**
Current status of parked vs active fleet
Historic profile of aircraft parked annually
Comparison versus competing types
- (v) **Operations**
Age profile & utilisation
Comparison versus competing types

4. Finance markets

- (i) **Aircraft transactions**
Latest annual transactions in full detail
Historic annual transactions for core type
Historic annual transactions for competing types

- (ii) **Values [Avitas data]**
Current market values
Base market rate
Operating cost ratios
Comparison versus competing types
Lease rates
- (iii) **Availability [Airfax data]**
Current availability of core types
Historic profile of availability
Comparison versus competing types

5. Market outlook

- (i) **Forecasts**
Short-term delivery profile – supply side
Medium-term trends forecast – supply side
Market outlook – demand side
- (ii) **Economic outlook**
Macro-economic factors – GDP, oil price etc,
Influence on aircraft buying/operating decisions
- (iii) **Airline financial outlook**
Airline industry financial trends – revenues, costs, profitability
Analysis by airline type and region
- (iv) **Airline traffic outlook**
Airline industry traffic – historic trend & forecast
Analysis by airline type and region

6. Operator profile

- (i) **Fleet by operator/owner**
- (ii) **Operator financials [For main carriers]**
Operating revenues by source
Expenses by major cost areas
- (iii) **Operating statistics**
Passenger & freight traffic statistics
Capacity, load-factor & yield analysis
- (iv) **Operator profiles**
Fleet analysis
Contact details & personnel
Ownership, subsidiaries & partnerships

7. Resources

Related articles, briefings, rankings, data tables and conference materials from:

- i. ACAS*
- ii. ICAO*
- iii. Commercial Aviation Report/Value Report/Online*
- iv. Commercial Aviation Events*
- v. Air Transport Intelligence*
- vi. Airline Business*
- vii. Flight International*

Other research available

- *Commercial aircraft maintenance*
- *Aircraft interiors*
- *Airline network strategy*
- *Military transports*
