

PAV705 PORTABLE PLAYER

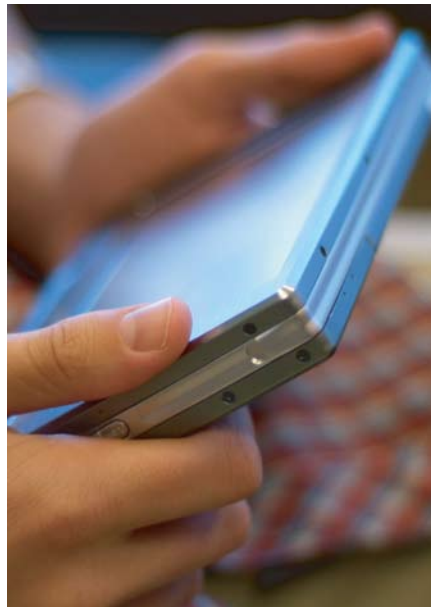

THE HOTTEST PORTABLE FLYING TODAY

The PAV705 is the leading portable for a reason. This high-resolution touchscreen player is the most versatile PMP utilizing best-of-class consumer technologies and packed with functionality.

The impressive list of airlines flying it would agree.

The PAV705 is a state-of-the-art handheld player featuring:

- 7" high-resolution touchscreen display
- Up to 320 hours of Audio and Video on Demand (AVOD) content
- Interactive games
- Magazines
- Newspapers
- Interactive surveys
- Availability for semi-embedded installations

Technology Strategy: Our strategy of leveraging consumer technologies enables access to the economic benefits of platforms that are being manufactured at consumer consumption levels, and R&D that has been largely amortized in the consumer space. These savings enable IMS to offer competitive pricing while also investing appropriately in the other components of the supply chain.

Quality Entertainment Experience: While offering significant cost savings over traditional in-seat IFE systems, portable solutions do not compromise on the entertainment experience. Your passengers can enjoy a full audio and video on demand environment with access to early-window Hollywood movies, audio CDs, multiple genres of video games, music videos, news that is updated multiple times daily, and much more.

Content Security: IMS portables maintain an embedded security solution that is supported by the leading Hollywood studios, allowing us to offer airlines the earliest available blockbuster movies.

Full Turnkey Solution: As important as the portable devices themselves, IMS provides a full turnkey solution with our Content Delivery Network (CDN) fast, automated updates of content and refresh of batteries. The CDN consists of Content Load Stations (CLS), Ground Pods (GPOD) and Content Integration Stations (CIS).

PAV705 PORTABLE PLAYER

Width
7.1" (182 mm)
