

USB Media Player

Fully **integrated hardware** giving passengers freedom and flexibility for a personalized in-flight media experience

Top Features and Benefits

- Standard USB port gives passengers freedom to view and listen to their own media content
- View slideshows of vacation photos and more
- Supports multiple picture file formats including GIF, JPEG, and BMP
- Read books or other Adobe PDF documents directly on the in-seat display

USB Media Player puts the passenger in charge of their in-flight entertainment experience. Equipped with a USB memory device, passengers can now carry on board a host of personalized content ranging from mp3 music, to digital pictures and Adobe® document files. Passengers can take advantage of the large in-seat display to read electronic books or create a slide show presentation of vacation photos from their trip. Left a personal media player at home? No problem. Passengers can create a play list, sit back, and enjoy their music directly from the IFE system. The USB Media Player gives the passenger freedom and flexibility for a truly personalized on-board media experience.

Elevate The Experience

USB Media Player Plus offers highly configurable features that can be tailored to suit the airline's individual needs.
