

[ " FLIGHT " Photographs

**MORE THAN 2,000 H.P. :** Two views of the Blackburn "Iris," with three Rolls-Royce "Condor" engines. This machine is of recent construction and may not, therefore, be described. Doubtless, however, keen observers will be able to appreciate from these photographs many of its special features. No dimensions may be given, but the size of the figures of members of the crew help to lend "scale" to the machine.
