

Strength without Weight.

That is the most important feature of our **MAGNESIUM ALLOYS**—they have the strength demanded for numerous automobile and aircraft purposes, yet they are 40% lighter than aluminium alloys.

We can supply these **MAGNESIUM ALLOYS** in the form of Forgings and Castings with the following tensile figures:—

Forgings: 20-22 tons per square inch.
Castings: 10-12 tons per square inch.

PLEASE WRITE US FOR FURTHER PARTICULARS.
