

The
**VICKERS-POTTS
OIL COOLER**

(English Patent No. 285524)

(Foreign Patents applied for)

For the efficient cooling of Lubricating Oil in Aero Engines.

Adopted by the British Air Ministry.

The illustration shows a Vickers-Potts Oil Cooler mounted on an "Asso" 1,000 h.p. Isotta Fraschini Aero Engine.

"Fabbrica Automobili Isotta Fraschini" of Milan write:
(TRANSLATION.)

"We have much pleasure in stating that the cooler which you supplied to us some time ago has been mounted on an aeroplane fitted with an 'Asso' 1,000 h.p. engine and has been found very reliable in its working, giving satisfactory results both as regards cooling and solidity of construction."

Available in all capacities to suit air-cooled or water-cooled engines of any horse-power.

The VICKERS-POTTS OIL COOLER has a lower aerodynamic resistance for cooling capacity provided than any other apparatus of similar purpose.
