

The "EAGLE" CREATES A NEW RECORD FOR LIGHT PLANES

Senor Juan Ignacio Pombo cables

Took off Bathurst in 650 metres. After two hours flying encountered storm and squalls which lasted for four hours. After ten hours flying side and head winds, side wind strength from 15 to 50 Km-hr. Arrived Natal after 16 hr. 42 min. flying. Congratulate you upon marvellous construction of the "Eagle" which throughout behaved faultlessly. I am very grateful.
Pombo
