

Illustration shows Aeroplane Shed roofed and side sheeted with CELLACTITE for Fairey Aviation Co., Ltd.

for **AERODROME BUILDINGS**

CELLACTITE

CELLACTITE steel-cored corrugated sheets have proved ideal for hangars and aerodrome buildings of all sorts. They provide permanent protection, whether installed as roofing or vertical cover, and the lightness and non-breakability of CELLACTITE make it ideal for the large sliding doors usual on such buildings.

Contracts include extensions for the Bristol Aeroplane Co., Ltd., Handley-Page, Ltd., numerous air sheds and buildings for the Air Ministry, and the Dekheila, Mersa Matruh, Almaza and El Arish hangars for the Civil Aviation Authorities in Egypt.

Roofs and Vertical Cover

**HEAT-INSULATOR · RESILIENT
LIGHT · STEEL-CORED · STRONG
GUARANTEED PERMANENT**

(1) Bitumen enveloped corrugated steel sheet on to which are bonded CELLACTITE Asbestos Asphalte felts, conferring (2) impermeability from without, and (3) special acid-proof and non-drip properties.

May we send you the CELLACTITE Reference Catalogues giving full particulars both of the sheeting and of the highly efficient CELLACTITE "Medway" Roof Ventilator in uniform material?
