The
TAYLORSUIT
and
 ELECTRO-THERMAL EQUIPMENT

The TAYLORSUIT has been designed as a whole. It embodies all the essentials—Comfort, Freedom of Movement, Warmth, Adaptability for Electrical Heating, Buoyancy, Fire Resistance, Quickness of Egress in the water or if on fire—and is as near the perfect "safety suit" as we can get it.

The TAYLORSUIT allows the body to breathe, thereby increasing efficiency. With the use of patent Quick Release Zips the Taylorsuit can be taken off in 12 seconds.

The TAYLORSUIT is designed for WINDAK Electro-Thermal Equipment, which can be used on 12 volt or 24 volt supplies without alteration. Provision is also made for WINDAK Electro-Thermal Gloves and Socks.

Booklet describing the TAYLORSUIT may be obtained direct from the manufacturers, who would post it to you "care of" your Station Adjutant.
