

## THE MUSTANG...

*"the longest-ranged single-engined  
fighter in the world"*

*"Aeroplane" copyright*

The New York "Herald-Tribune," commenting on the new Mustang, said: "Many have long regarded it as the best fighter plane produced in the States, but it remained for the British to discover it. If it had not been for British orders, it would never have been developed at all. Its full potentialities were brought out only when the British designed Rolls-Royce Merlin engine was installed."
