YOU'RE TELLING US!

The frequent enquiries we are getting from all manner of industries tell us what a great post-war future awaits ONAZOTE II in all fields where thermal insulation and lightweight construction are of prime importance. ONAZOTE II, made entirely from high-grade synthetic rubber, is now fulfilling the demands originally satisfied by ONAZOTE I, a natural rubber product which is no longer available.

WHAT IS ONAZOTE II?

ONAZOTE II is an expanded hard synthetic rubber material with exceptional thermal insulating properties. It possesses mechanical and physical properties equivalent to those of natural rubber and yet has the added advantage of a higher soften-point, thereby rendering it more suitable for use under tropical conditions. It is extremely light and buoyant, yet strong enough to meet all demands. It is non-warping and non-water-absorbent; bacteria and vermin proof; not subject to deterioration.

HOW IS ONAZOTE II USED?

ONAZOTE II is ideal for use as a low density stabilising core in the construction of deck-housings, partition walls, panelling, doors, furniture and interior fittings. Adhered in the well-known "sandwich" technique between wallboard, plywood veneers, aluminium, lightweight alloy sheets or other suitable material, it finds a place in flat or curved panel work. It can also be supplied in various moulded sections. As a buoyancy material it is particularly suitable for the construction of floats, mooring buoys, pick-up buoys and various types of life-saving appliances.

WHAT GIVES ONAZOTE II ITS LOW THERMAL CONDUCTIVITY?

The unique non-intercommunicating cellular construction of ONAZOTE II and its allied materials eliminates convection currents and thus provides an insulating medium of the highest known efficiency.

There is probably a use for ONAZOTE II in your business. At present, owing to war demands, supplies are restricted except for priority purposes, but we will gladly give you our expert advice on the use of this remarkable material. Please write or 'phone us.

EXPANDED RUBBER COMPANY LIMITED, 675 MITCHAM ROAD, CROYDON.

DERMATITIS is the "operative" danger

Industrial dermatitis is the gravest menace to your operatives working efficiency. Metal dust, oil, grease, chemicals and dirt wreak havoc with unprotected hands, working into the pores and setting up skin diseases and eruptions. Sternocleanse eliminates this trouble because, if rubbed into the hands (and arms) before work, it interposes an imperceptible but 100% protective "glove" between the skin and deleterious matter. It is washed off, together with impurities, without violent scouring ... just soap and water does it ... leaving the hands healthily, hygienically clean.

MAXIMUM PRODUCTION DEMANDS

Sternocleanse is packed in 12 x 2-lb. tins, 6 x 7-lb. tins. Also in 28-lb. and 1-cwt. kegs.

No. 1 for protection against paint, grease, oil, etc.
No. 2 for protection against soluble oil, spirits and chemical solutions.

All enquiries should be addressed to Industrial Specialities, Dept. 33:
STERNOL LTD., FINSBURY SQUARE, LONDON, E.C.2
Telephone: MONarch 8071-2-3-4-5. Telegrams: "Sternoline, Phone, London."
