

The Exide 24V. battery is the lightest British civil aircraft battery of its voltage and capacity. That one fact gives it a very sound claim for consideration when batteries are being chosen for aircraft. What else has this Exide battery to offer? Exceptional electrical performance, long-life plates and high current outputs for engine starting. Very advanced design in every detail—but *sound* design, bred from over 50 years' experience of battery manufacture. Not only best because lightest—but lightest *and* best.

Exide

AIRCRAFT BATTERY

24 V. 15 Ah. 32½ lb. — 24 V. 25 Ah. 43½ lb.
