ENGLISH ELECTRIC AVIATION LTD

Guided Weapons Division

LUTON

An unrivalled opportunity exists for a

THEORETICAL AERODYNAMICIST

to sponsor theoretical studies, and stimulate and guide experimental research in the Guided Weapons Division.

This is a senior post, requiring an honours graduate with experience in Supersonic Aerodynamics, and a broad physical grasp of the subject. Post graduate qualification would be an advantage, and the starting salary will match the qualifications and experience finally selected.

There is also a more junior post, for a man with similar qualifications but less experience, to assist in this work.

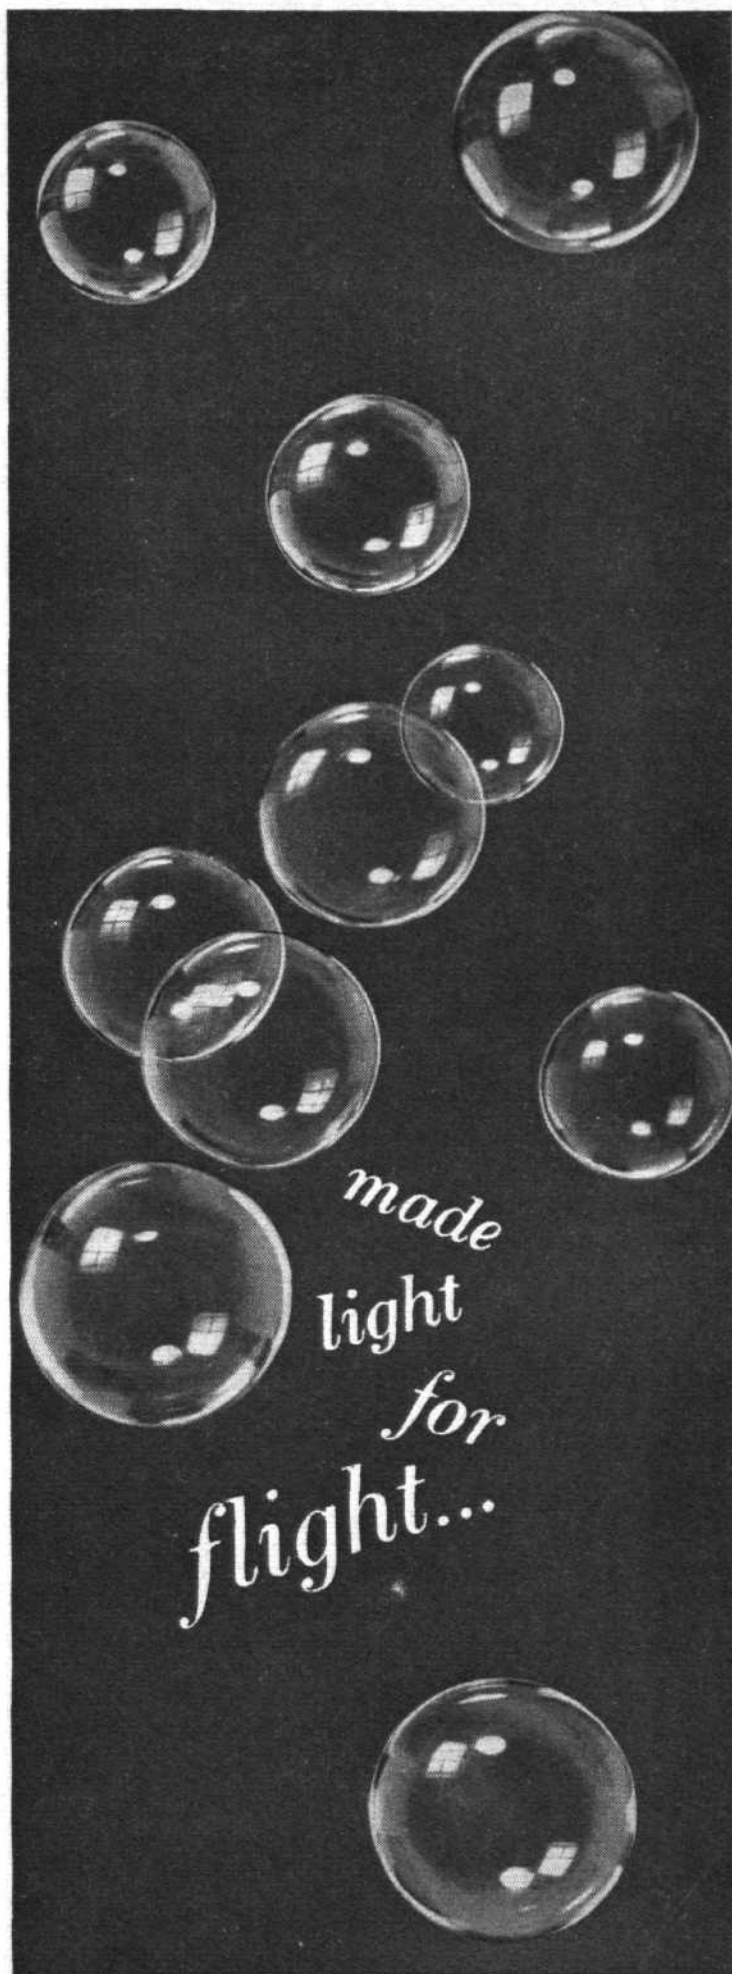

Assistance with housing and removal expenses may be given

and the Company provides the amenities associated with a large organisation.

Applications should be sent, in confidence, to

**Dr. D. A. LAYNE, Dept. G.P.S., MARCONI HOUSE,
336/7 STRAND, LONDON W.C.2,**

quoting reference F610E.
