

FLIGHT SIMULATION

Modern aircraft, whether they be Military or Civil with fixed or rotating wings, are worthy of the best training equipment available and MILES ELECTRONICS LIMITED is proud of its reputation in this field. Designed by aeronautical and electronic engineers familiar with all aspects of aircraft design and operation the Miles Flight Simulator and other training aids represent the most advanced equipment of their kind. They have been ordered by the British Government for use by the Royal Navy and the Royal Air Force to assist in the training of aircrews.

FLIGHT SIMULATORS REACTOR COMPUTERS
SPECIAL PURPOSE ELECTRONIC EQUIPMENT

Flexible layouts combined with a high degree of standardization ensure maximum utilization, minimum outlay on spares and simple maintenance by relatively unskilled labour. Last, but by no means least, their design permits the easy introduction of modifications to match changes in the aircraft and its equipment. Simulation is our business and, whatever the problem, the experience and facilities of MILES ELECTRONICS LIMITED are at your service.
