HS 748 MF

Armed forces throughout the Free World rely on Hawker Siddeley aircraft and missiles for defence and peacetime training.

Future pilots can be trained at low cost on the Hawker Siddeley Gnat, which has a transonic performance. Operational aircraft from Hawker Siddeley include the Buccaneer low-level strike/reconnaissance aircraft and the 748 MF transport.

For defence Hawker Siddeley produce a wide range of missile systems: Blue Steel (air-to-ground); Seaslug (ship-to-air); Firestreak and Red Top (air-to-air); and CF299, a new small ship guided weapon system. The Hawker Siddeley Blue Streak satellite launcher is Britain's contribution to the European space programme.
