

We can show you what it is, and can demonstrate what it does.

The particles of dirt our filters eliminate from aircraft hydraulic systems are invisible to the naked eye. So minute that no-one can trap them without mechanical help.

Our filters have been proved the best at doing just this.

Fairey filtration units are specified for most leading aircraft in Britain today—and for a growing number of European aircraft, including the Concorde. Fairey filtration units offer maximum reliability under extreme operating conditions.
