

Beechcraft Queen Air B80. Seats up to 11. Speeds to 248 mph. Huge 3680-pound useful load.

## Why do military services the world over choose Beechcrafts?

A visit to the Beechcraft assembly line is like a short trip to the United Nations. As planes reach the final stages of production, you will recognize emblems being painted for military forces around the entire free world. Many of the planes are Beechcraft Queen Airs like the one above. (They are widely used as transports, trainers and photographic airplanes.) Still others are two-place Musketeer trainers. In fact, all 18 different Beechcraft models serve important military assignments.

The qualities that make Beechcrafts desirable for military services are the same ones that make them first choice of leading businessmen and govern-

ments throughout the world. Each Beechcraft model is the recognized top of its class. Each is roomy, comfortable and relaxing to fly in. Easy to fly, each offers an unchallenged combination of high speed, long range and operating efficiency. Each is the finest product of 35 years of engineering experience and craftsmanship.

Because Beechcraft owners travel far and wide, they need a plane with service facilities that match its performance. They find it at the world-wide Beechcraft service centers. The finest airplanes in their class, plus the finest world-wide service... that's why Beechcrafts are the choice of military services, corporations, governments

and important people in every profession. To learn more about the benefits of owning a Beechcraft, visit your nearest Dealer or write Beech Aircraft Corporation, 9799 E. Central, Wichita, Kansas 67201, U.S.A., for information. There is no obligation.
