

**We're expanding our  
service centre network  
where you need it most.  
Everywhere.**

Anywhere in the world you operate a P&WC engine, you're never far from one of our service centres. We've added major regional centres in Europe and Asia. And we're continually expanding and upgrading our repair and overhaul capacity to provide faster, more competitive service. It's just one part of a multi-layered support system designed to bring every P&WC customer peace of mind, everywhere they fly. That's what you expect from Pratt & Whitney Canada.
