EQUIPMENT/MAINTENANCE/SERVICE

Reduce Costs on Engine Maintenance

The Revolutionary New Inverted Airflow System

**CONDENSATION IS THE ENEMY
OF THE STORED ENGINE!**

The Jetcell[®] is a relatively simple concept which has been designed to fight condensation. Now for less than 2p a day (running cost) you can protect any engine from the potential damage caused by condensation, acid contaminated dust particles, salt atmosphere and much more.

- ◆ ACID CONTAMINATED DUST IS EVERYWHERE
- ◆ TAKE THE RISK OUT OF STORING ENGINES AND HELICOPTERS
- ◆ PROTECTED AND SECURE FROM THE ELEMENTS
- ◆ JETCELL IS SUITABLE FOR ALL AIRCRAFT ENGINES, APU's AND HELICOPTERS
- ◆ JETCELL MAY BE ORDERED WITH YOUR COMPANY NAME AND TRADEMARK

"Our two-year trial of this unique and innovative concept substantiated the belief that it resolves many of the old storage problems."

Harold Greenhalgh, Group Quality Manager, European Aviation Limited.
