

THOMSON-CSF RACAL

...A Powerful New Force

Apart, Thomson-CSF and Racal Electronics
are two great companies.

Together, we are now a powerful new
'prime-contractor' force for the major, global defence
systems and aerospace programmes of the future, as well
as for the information technology and services markets.

Just how powerful, we can show you at Farnborough
International, 24 – 30 July. To learn more about
our advanced defence electronics systems,
visit us on Stand E4 Hall 1 and for our aerospace
credentials, come to Stand B9 in Hall 3.
