

## HELP US CREATE THE FUTURE

CONTOUR Premium Aircraft Seating is a global name in the design and manufacture of premium passenger aircraft seating, and is leading the field in this rapidly expanding and increasingly demanding sector.

C O N T O U R | PREMIUM AIRCRAFT SEATING

We are currently looking to recruit the following personnel:

### Technical Office Manager

Reporting to the Engineering Director, you will manage and develop the technical office function and its staff in the Seating Engineering Department, comprising stress/structures, certification/approvals, analysts/test (Mechanical & Electrical), for all company aircraft seating products.

To succeed within this role, you will be HND/Degree qualified in a mechanical/aeronautical/structural engineering field, with a good working engineering and safety background in an aerospace environment, including test programmes and test facilities and preparing cost/schedule reports. You will be a proactive leader with a minimum of 5 years supervisory experience gained in a comparable role, complimented by outstanding project and people management skills and specification report writing skills. Possession of a professional qualification would be considered an advantage.

### Senior Design Engineer

Reporting to the Design Engineering Manager, you will be a quality focused, highly skilled engineer with at least 10 years' experience within the aeronautical field. You will utilise your excellent team leadership skills to motivate your team to develop concepts/drawings of the highest standard, incorporating innovation and product enhancement.

Your professional credibility will be complemented by CAD/CATIA and HNC qualification in Mechanical Engineering.

### Stress Engineer

Reporting to the Technical Office Manager, you will be responsible for preparing, reviewing and approving stress and structural documentation for submission for customer and regulatory approval.

HNC/Degree qualified in Mechanical/Structural Engineering, you will have excellent specification/report writing and people management skills, be experienced in preparing test articles, conducting test programmes and organising test facilities.

### Certification Engineer

Reporting to the Technical Office Manager, your previous experience of preparing and conducting test programmes will enable you to assist with the preparation of certification documentation and conduct certification testing for the approval of aircraft seating products.

Possession of a HNC in mechanical/aeronautical/structural engineering is essential, as is excellent project management, customer liaison and leadership skills. You will be required to provide hands on support during test programmes and support the Senior Certification Engineer as and when required.

**For all the above posts**, as well as a full driving licence and the ability to travel abroad and within the UK, you must have experience of working to regulatory standards and quality procedures within the aerospace industry and possess good communication and IT skills.

**To apply, please send a current CV and covering letter indicating current salary to the HR Officer at Contour Premium Aircraft Seating at the address below or e-mail: [sian.thomas@contour.aero](mailto:sian.thomas@contour.aero)**
